## IN CAPITAL CORRIDORS

### There Was James Bond and Then . . .

A spate of "true" spy books is coming on the market, hoping to cash in on the James Bond craze. The most sensational of these is the forthcoming "Oleg Penkovsky Papers," written by Greville Wynne, the Briton who was arrested by Soviet police for being the contact man between Western intelligence and Penkovsky, an official in the Soviet scientific agency.

GORDON LONSDALE

Penkovsky was executed, and Wynne eventually was released. The "papers" are said by U. S. intelligence to be highly dubious.

The other book, also to be published in Great Britain and the United States, is a forthcoming autobiography of Gordon Lonsdale, who was arrested in England for spying for Russia, and then traded off to the Russians for Wynne.

Some people believe the Lonsdale book was authorized by the Soviet secret police as a counter to the Western book about Penkovsky.
